REF. CC-2611 // WORKSHOP

SHOWCASE

42 WARSAW · AUDITORIUM

CO-OPERATIVE CODING

NO LAPTOP NEEDED

Two people. Two AI agents. One repo. Watch a small team plan, split and ship a real game, live, then play it on your phone.

01
The AI toolkit
MCPs, connectors, skills, subagents and orchestrators, sorted by three simple questions.

02
The team flow
Roles, a shared contract, issues with "done when", branches, pull requests, CI and sign-off.

03
Build live
Backend and frontend in parallel, one agent each. Then the room plays what we built.

BRING A PHONE
